

Managed IDS Services: Protecting your organization on your terms

Intrusion detection systems (IDS) are critical to providing proactive identification of threats to the confidentiality, integrity, or availability of your computing environment and critical data. While there may be no doubt about the necessity of intrusion detection, you may be seeking a

“Choose the Managed IDS option that best fits your operational and budgetary requirements.”

better way to monitor and manage your system or a cost effective way to deploy an IDS if you don't have one.

Through our Managed Security Services, Allied InfoSecurity provides either monitored or fully managed IDS/IPS service

for your existing devices. Alternatively, for customers who do not currently have deployed devices, we can provide robust IDS capabilities through the integrated netSensor™ IDS.

Overview: Monitored IDS/IPS Services

Monitored IDS/IPS Services are ideal if you prefer to handle your own IDS/IPS management. Using the netSensor™ appliance, we capture all activity on your IDS or IPS, compress the data, and securely transmit it to our Security Operations Center (SOC) for examination by our analysts. We report all confirmed security incidents to your staff according to pre-defined escalation procedures.

About Allied InfoSecurity, Inc.

An independent company focused only on security and staffed by certified security professionals, Allied InfoSecurity is a consulting and outsourcing provider that helps businesses improve and manage their information security programs, mitigate risk, and respond to regulatory and marketplace demands more quickly and effectively than they could on their own.

With Monitored IDS/IPS Services, you benefit from:

- Continuous monitoring of IDS/IPS stability and performance
- Continuous examination of IDS/IPS output for security risks
- Custom alerting and escalation for any issues
- Convenient online access to dashboard reports and logged data
- Monthly statistical threat summary report
- Monthly reporting of all activities performed by security analysts
- 24x7 or 8x5 service options
- Access to monthly “State of the Network” webcast

Incident response assistance is available as an add-on service.

Overview: Managed IDS/IPS Services

With this solution, you can transfer responsibility for the complex, time-consuming, and often costly task of IDS/IPS management to Allied InfoSecurity. Our security analysts administer, monitor, and manage your IDS/IPS system—maintaining it to top standards, including signature, configuration, and firmware updates, custom signature creation, and continuous threat monitoring and alerting. We will also interface with your hardware and/or software vendors to resolve any break-fix issues.

Supported Platforms

- Cisco
- Check Point
- Juniper Networks
- SonicWALL
- Fortinet
- Sourcefire/Snort
- Many other enterprise and SOHO devices, including multifunction devices

With Managed IDS/IPS Services, you enjoy all of the benefits previously outlined under Monitored IDS/IPS Services, as well as:

- IDS/IPS architecture, configuration, and placement guidance
- Implementation of all signature, configuration, and firmware updates, including change management and documentation

- Daily backup of device configurations
- Expert interaction with vendors for hardware/software problems
- Fully managed customer device or netSensor™ IDS

Overview: SecurePoint™ netSensor™ IDS

Allied InfoSecurity has based the netSensor™ around the Snort open-source IDS platform—considered by many to be the most comprehensive IDS platform available today. Compared to deploying proprietary IDS/IPS hardware or software, the netSensor™ IDS delivers significant cost savings while increasing the security posture of your network, critical applications, and databases. The netSensor™ IDS service includes all of the hardware, software, and management and monitoring services (described below) to provide you the peace of mind that your network security is in good hands.

About Allied InfoSecurity Managed Security Services

Allied InfoSecurity provides a flexible set of security management and monitoring capabilities that we can quickly adapt to your organization's specific needs. Just as important, you save time and money because we deliver this comprehensive suite of services using your existing infrastructure.
